FOR IMMEDIATE RELEASE

SinfoniaRx and Sinfonia Family Services of Louisiana Partner to Launch an Innovative Health and Wellness Program for Employees of New Orleans Public Belt Railroad

May 5, 2015, Tucson, AZ-New Orleans Public Belt Railroad announced today the launch of an innovative health and wellness program that includes health screening, on-site vaccinations, medication therapy management, counseling, and educational seminars. The program will be delivered by Sinfonia Family Services (SFS) of Louisiana and SinfoniaRx. The goals of the program are to improve workplace moral, quality of life, optimize the treatment of chronic illness, and ensure medication safety. Both SFS of Louisiana and SinfoniaRx are divisions of Tucson, Arizona, based Sinfonia HealthCare Corp. Sinfonia HealthCare Corp. is a national health care provider launched in 2013 by Fletcher McCusker, former CEO and founder of Providence Service Corporation (PRSC-NASDAQ). Sinfonia opened the Louisiana agency in October under the direction of Jo-Ann Prisco, Executive Vice President of the East and led by SFS Louisiana CEO Kathleen Saintcross and plans on community based services in Jefferson Parish, New Orleans and Lafayette.

Educational seminars and counseling services will be delivered by SFS of Louisiana while medication therapy management services will be delivered by SinfoniaRx.

SFS of Louisiana is a new and innovative provider of integrated wellness services for individuals and families in Louisiana. "We are looking forward to partnering with the NOPBRR to bring high quality services to their employees and families", said Kathleen Saintcross, CEO of SFS of Louisiana. "These partnerships have positive impacts on our community as a whole."

SinfoniaRx is the largest provider of medication therapy management services in the United States. "We are excited to work with the NOPBRR on this new innovative program." Said Kevin Boesen, CEO of SinfoniaRx. "Managing complex chronic illness can be a real challenge. This program will support both employees with chronic illness and employees serving as care-givers for family members with chronic illness and complex medication regimens." Medication therapy management services are a requirement for Medicare health plans and there is a growing trend to expand these services to more patients.
